

Fund summary

The Fair Oaks Dynamic Credit Fund (the "Fund") offers global access to senior secured corporate loans through investments in Collateralised Loan Obligations ("CLOs"). The Fund is actively managed with a strong emphasis on bottom-up fundamental credit analysis. The Fund primarily seeks exposure to investment-grade rated CLO securities on a long-only basis and with no leverage used at fund level.

Commentary

The Fund returned +0.2%¹ in October, compared with -0.5% for the JP Morgan CLOIE BBB Index. The gross yield to expected maturity of the portfolio is 4.8%, offering compelling relative value vs BBB rated European corporate bonds (0.5%)² or even BB rated European loans (3.2%)³.

The trailing 12-month loan default rate was unchanged (2.6%) in Europe and down to 4.1% from 4.2% in the US⁴. Distressed ratios (loans trading below 80c, a potential indicator of the direction of future defaults) continued to decrease, from 6.8% to 6.1% in Europe and from 8.2% to 7.5% in the US⁴.

It is worth noting that the yield comparison with corporate indices assumes no defaults in the underlying loans or bonds. The 3.2% yield on the BB European loan index, for example, assumes a zero loan default rate and would fall to 1.2% with a constant 5% annual default rate⁵. The yield on a BB or BBB CLO note, however, will be stable until defaults are large enough to erode the support provided by the junior CLO tranches. We estimate that the gross yield to maturity of the FODC portfolio will not fall below 4% until the constant annual default rate (to maturity) suffered by the underlying loans exceeds 9%⁶.

We believe that the removal of political uncertainty after the US elections and the broader muted market reaction to additional COVID restrictions in Europe should support a reduction of the spread differential between CLO rated notes and corporate indices based on the attractive yield provided by CLO notes and their higher resilience to any deterioration of credit fundamentals.
