

## Fund summary

The Fair Oaks Dynamic Credit Fund (the "Fund") offers global access to senior secured corporate loans through investments in Collateralised Loan Obligations ("CLOs"). The Fund is actively managed with a strong emphasis on bottom-up fundamental credit analysis. The Fund primarily seeks exposure to investment-grade rated CLO securities on a long-only basis and with no leverage used at fund level.

## Commentary

The Fund generated a net return of +0.90% in February.<sup>1</sup> The JPM EUR High Yield Index returned +0.51%<sup>2</sup> and the European Leveraged Loan Index returned +0.48% in the month.<sup>3</sup>

The portfolio's gross yield to maturity is 7.3% and the gross yield to expected call is 8.2%. This compares to the yield to maturity of 6.9% for the JP Morgan European High Yield Index.<sup>2</sup>

The European loan default rate was unchanged at 1.86% and the US loan default rate decreased from 1.47% to 1.41% in January. The forward-looking distress ratio decreased from 2.84% to 2.80% in Europe and decreased from 5.48% to 5.08% in the US.<sup>4</sup>

While headline CLO spreads have continued to tighten, pricing dispersion was more pronounced in February as primary AAA spreads of managed deals ranged from 148 bps to 170 bps. This range reflects more pronounced manager tiering and differences in deal structures.<sup>5</sup> In February, CLO refinancing/reset activity (which results in par repayments of CLO debt) reached volumes of €1.4bn and \$14.4bn, the highest seen in over two years in both Europe and the US. This phenomenon was supported by the increasing number of CLOs exiting their reinvestment period and the tightening of CLO spreads.<sup>6</sup>

The year-to-date European and US CLO new issue volumes of €5.4bn and \$26.0bn mark the fastest start since 2008.<sup>7</sup> Given this constructive environment, JP Morgan increased its European 2024 new issue forecast to €30bn (+20% vs previous forecasts). Similarly, JP Morgan and Bank of America project US 2024 new issue volumes of \$130bn (+13%) and \$145bn (+32%).<sup>8</sup>

The positive performance of CLOs, despite a robust primary supply in February, has been supported by sustained investor inflows, as demonstrated by the \$1.6bn inflow into CLO ETFs year-to-date.<sup>9</sup> We believe that CLO mezzanine debt holds significant relative value compared to similar asset classes. Currently, CLO BBB spreads are 16 bps wider than high yield bonds, in contrast to a historical average of being 68 bps tighter.<sup>10</sup> This, coupled with the potential for earlier-than-expected calls and attractive carry, continues to present CLO mezzanine notes as a compelling opportunity in the current market context.
