

Fund summary

The Fund offers access to AAA-rated notes of European and US Collateralised Loan Obligations ("CLOs"), on a long-only basis and with no leverage used at fund level.

CLOs are structured products backed by diversified portfolios of senior secured bank loans and actively managed, not in reference to any benchmark, by specialist managers. AAA-rated CLO securities benefit from incremental protection from the loss-absorbing equity and junior-ranking debt.

Fair Oaks believes that AAA-rated CLOs offer significant relative value compared to corporate bonds and other asset-backed securities. According to Standard & Poor's, in the period 1997 to 2024, the cumulative default rate for AAA-rated global CLOs was 0.0%.¹

Investment strategy

Fair Oaks' strategy is to identify attractive risk-adjusted investment opportunities in AAA-rated CLOs via a combination of detailed credit analysis, in-depth structural and documentation review and rigorous manager due diligence. Fair Oaks seeks to optimise returns through active security selection and asset allocation across geographies and rating categories. The Fund is actively managed and portfolio construction is undertaken without reference to any benchmark index; the Investment Manager has full discretion to deviate completely from all indices.

Key risks

The following risks may affect the Sub-Fund. Full details of all risks the Sub-Fund is exposed to are provided in the Prospectus and KIID.

CLO valuation: The value of a CLO may be affected by a number of factors, including: credit spreads, changes in the performance or the market's perception of the underlying assets backing the security and changes in the market's perception of the adequacy of credit support built into the security's structure to protect against losses.

CLO liquidity: The secondary market for CLOs may not be as liquid as the secondary market for corporate debt. As a result, the Investment Manager could find it more difficult to sell these investments or may be able to sell them only at prices lower than if they were more widely traded. It may be difficult to establish accurate prices for such investments for the purposes of calculating the Sub-fund's Net Asset Value. Therefore, prices realised upon the sale of such investments may be lower than the prices used in calculating the Sub-fund's Net Asset Value.

Dependence on Managers of CLOs: The performance of the Sub-fund's investments in CLOs will depend in part upon the performance and operational effectiveness of the managers of the CLOs.
